

How to add or delete users associated with a study

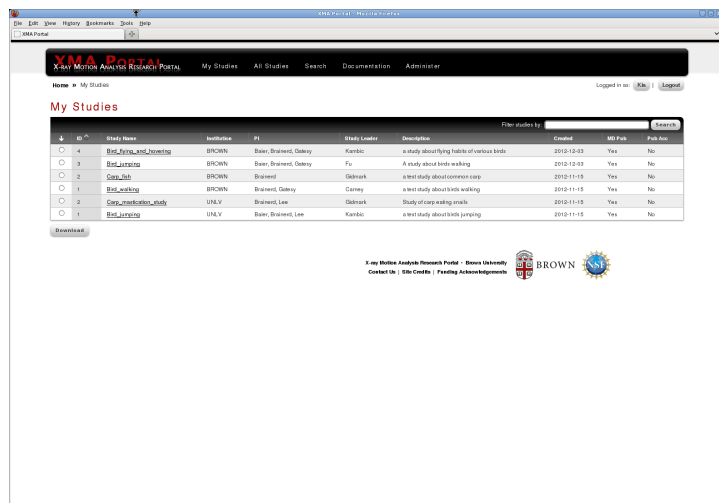

How to add users to a study

By default when a study is created, the following people have access to that study:

- the PI(s) designated when a study is created
- the lab-managers of each PI.
- the study leader designated when a study is created

Once the study is created, the PI(s) and lab-managers for that study can add additional users (or delete users that have been added).

A screencast showing the process of adding users is here below, click on the image to play the animation. *Do Shift+reload page to start the animation from the beginning.*

| ID | Study Name | Institute | PI | Study Leader | Description | Created | HD Path | Pub Acc |
|----|---------------------------|-----------|-------------------------|--------------|---|------------|---------|---------|
| 4 | Biol_SynBio_Homeste | BROWN | Basic, Biorevel, Gately | Kapitec | a study about living bacteria of various kinds. | 2010-12-03 | Yes | No |
| 3 | Biol_Library | BROWN | Basic, Biorevel, Gately | Fu | A study about books reading | 2010-12-03 | Yes | No |
| 2 | Comp_Lab | BROWN | Biorevel | Gikmek | a test study about common comp. | 2010-11-15 | Yes | No |
| 1 | Biol_Reading | BROWN | Biorevel, Gately | Carney | a test study about books reading | 2010-11-15 | Yes | No |
| 2 | Comp_Infrastructure_Study | UNLV | Biorevel, Lee | Gikmek | Study of comp reading events | 2010-11-15 | Yes | No |
| 1 | Biol_Library | UNLV | Basic, Biorevel, Lee | Kapitec | a test study about books reading | 2010-11-15 | Yes | No |

How to remove users from a study

Deleting an existing users associated with a study is very similar to the above process of adding a user, except for instead use the "Delete User" button in the above process.

*Notice: The PI(s)/lab-managers and study leader associated with a study **can not** be deleted. If you need to modify a PI or study leader for a study contact the portal administrator.*
