Stress Pattern	Number of Syllables	Primary Stress
a ro MA tic	4	third

Statement	Instructor's Question	Student's Question	Non-Chemistry Usage
Aromatic <a href="#">compounds</a> were named for their characteristic odor before Kekule had discovered the <a href="#">structure</a> of benzene and long before molecular orbitals were understood.	Tell me why aromatic <a href="#">compounds</a> are more stable than a ball-and-stick model of their <a href="#">structures</a> might suggest.	Can you tell us why early chemists used the term "aromatic" for this class of <a href="#">compounds</a> ?	This curry is aromatic and delicious! What a wonderful aroma is coming from the kitchen. Aromatherapy smells nice, but does it actually cure anything?
