

# Aromatic exercises

Stress Pattern	Number of Syllables	Primary Stress
a ro MA tic	4	third

## Suggested exercises

1. Explain to a student why aromatic compounds are more stable than the same number of double and single bonds would suggest.

F

## Useful words

resonance  
delocalization  
molecular orbital

F

2. What reactions distinguish between aromatic compounds and simple alkenes?

F

bromine addition  
permanganate oxidation  
Diels-Alder addition

F
