

# Alkenes

## Alkenes

Stress Pattern	Number of Syllables	Primary Stress
AL kenes	2	first

Statement	Instructor's Question	Student's Question	Non-Chemistry Usage
Alkenes are compounds of carbon and hydrogen containing one or more carbon-carbon double bonds.	Which is more easily oxidized, a typical alkene or the alkanes of the same carbon skeleton?	I'm curious. Why doesn't benzene react like a typical alkene?
